

## Feedback

### Dheeraj:

1. Requires login everytime when we open the application
2. User Interface is responsive and easy to handle.
3. There is No button to go on previous page at QR Code functionality.

### sarthak:

4. The app launches quickly and works smoothly.
5. While signing up, I was able to create an account, but I couldn't continue as an error message appeared.

### Rutuja:

6. App starts quickly and works smoothly.
7. First time signing up is working correctly.but after some time I couldn't continue error messages appeared.

### Nikhil:

8. Apps starts fast
9. App sign shows error after account is created
10. Image is stored successfully

### Kajal:

11. Facing a Signup issue ( the app shows a character error during registration.)
12. Having a Login issue – unable to access the app

### Anurag:

13. The user interface is simple and easy to understand.
14. Sign-up works initially, but later the app crashes while trying to log in.

### Soham:

15. App loads quickly and navigation is smooth.
16. Facing an error after registration – unable to log in successfully.

### Kalyani:

17. Application design looks clean and easy to use.
18. However, login takes multiple attempts sometimes.

### Mrunal:

19. Cant be installed on IOS.

### Arnav:

20: Having problems for login and creating account.

## Summary

Overall, the application is appreciated for its quick launch speed, smooth navigation, and user-friendly interface. However, multiple users reported issues with the signup and login processes, including recurring errors after registration and repeated login attempts. A few users also faced installation issues on their devices. Improvements are recommended in authentication flow, error handling, and providing navigation options like a back button in the QR code section to enhance the user experience.
